

Reliable solutions for a complex world

Delivering innovative turnkey solutions that solve complex challenges, streamline operations and drive lasting success.

We are a global leader in high quality turnkey engineering, fabrication, and maintenance. We understand that every industry, and every site, comes with its own set of challenges. That's why we take a tailored approach, combining technical expertise with deep sector insight to deliver reliable, fit-for-purpose solutions.

At Beltech Group, we believe real capability isn't about scale, it's about precision, accountability, and showing up with the right expertise when it counts.

With over 27 years in mining and maintenance, from mechanical technician to maintenance leadership roles with BHP, I started Beltech to be the kind of partner I always valued: one that's agile, reliable, and deeply invested in performance from the ground up.

Today, we support critical industries across Australia and around the world, including mining, defence, civil infrastructure, agribusiness and energy, through solutions that are hands-on, high-quality, and built for long-term impact.

Whether it's specialised maintenance, expert crews, fabrication or end-to-end delivery, we bring a level of care, clarity and technical depth that sets us apart. We don't just get the job done, we get it done with purpose, precision, and pride.

Who we are

We deliver innovative turnkey solutions with a precision-focus, empowering our clients to achieve operational excellence.

Since launching in 2015, Beltech Group has grown from a local operation in Queensland, into a globally recognised leader in turnkey engineering, fabrication, and maintenance solutions.

Our reputation is built on delivering specialised expertise across critical industries, including mining, defence, civil infrastructure, agribusiness, and energy, with an unwavering focus on quality and performance.

We set the benchmark in every field we serve. Our expert multidisciplinary team consistently delivers exceptional results, combining deep technical knowledge with reliability, versatility, and integrity. Whether it's a major infrastructure build or precision maintenance, every project is approached with professionalism, precision, and a commitment to detail.

At Beltech, our team doesn't just deliver outstanding end-to-end services, we build lasting, trusted partnerships. By aligning closely with each client's goals, we provide tailored solutions that drive real outcomes. It's this client-first approach that makes Beltech the dependable partner for complex challenges and for ensuring long-term resilience and success.

At Beltech Group, we're a global leader in high quality turnkey engineering, fabrication, and maintenance. Renowned for our specialist expertise, we set the benchmark in every project we deliver, with unmatched quality, efficiency, and reliability.

Trusted services, tailored to every industry

At Beltech Group, we understand that every industry, and every site, comes with its own set of challenges. That's why we take a tailored approach, combining technical expertise with deep sector insight to deliver reliable, fit-for-purpose solutions. From our head office in Brisbane, Queensland, we support clients across mining, defence, civil infrastructure, agribusiness, and energy, with a focus on strong partnerships, operational excellence, and results that endure.

Trusted worldwide, our agile team meets complex demands with care and precision

With over 70 skilled professionals and a fully scalable workforce model, the Beltech team delivers across industries, regions, and requirements. Whether it's rapid mobilisation for shutdowns, embedded site crews, or long-term project support, our people bring reliability, flexibility, and pride to every job, wherever it takes them.

BELTECH ENGINEERING FOUNDED

In October 2015, Owen established Beltech Engineering, opening its first workshops in Adelaide, South Australia and Kambalda West, Western Australia. Our vision was clear: to deliver high-quality maintenance and consulting services built on reliability, expertise, and client-first values.

BELTECH ENGINEERING OPENS 3RD WORKSHOP

In February 2019, Beltech Engineering expanded its Queensland presence with the opening of a larger workshop in Mount Isa, purpose-built to handle larger-scale fabrication, maintenance, and rebuild projects across the region.

BELTECH ENGINEERING CONSOLIDATES & RELOCATES

In April 2022, Beltech Engineering relocated to Townsville to establish a larger and more advanced workshop, strategically positioned as a central hub to support operations. This move consolidated our Adelaide and Mt Isa facilities into a single, high-performance location designed to enhance efficiency, collaboration, and service delivery.

BELTECH ENGINEERING MOVES TO BRISBANE

In July 2025, Beltech Engineering proudly opened their head office in Brisbane, positioning itself in a central hub to meet growing demand and deliver faster, more responsive service to clients across Queensland and beyond. The move supports our continued growth and commitment to operational excellence.

BELTECH GROUP IS BORN

Beltech Engineering evolved into Beltech Group, a dynamic collective of specialist services and products, reflecting its growth, diversification and commitment to delivering end-to-end solutions across a multitude of industries.

What we stand for

We care about our people

We champion safety, inclusion, and respect, making sure every team member and client feels valued, supported, and heard.

We act with integrity

We're honest, transparent, and accountable, delivering on our promises and communicating with clarity.

We focus on quality

We deliver precise, high-calibre work, driven by attention to detail and a commitment to excellence.

We redefine through innovation

We embrace new ideas, technologies, and ways of working, continually improving how we operate.

We are versatile

We adapt to challenges and client needs, staying flexible without compromising on standards.

We are committed to sustainability

We design smarter, more efficient solutions, minimising impact and building long-term value.

How we work

At Beltech Group, the way we work reflects who we are, a dedicated team committed to operational excellence, ethical leadership, and positive long-term impact.

We firmly believe that trust is earned through reliability, accountability, and the strength of our values in action. Every aspect of our everyday operations is guided by a clear commitment to safety, people, community, and responsible governance. These pillars are not just policies, they're the foundation on which we build and deliver lasting success.

PEOPLE & SAFETY

Our people are our greatest asset and their safety is our highest priority. We foster a culture where safety is embedded in every action, from site preparation to final commissioning. Through continuous group safety and health training, implementing industry-leading safety systems, and a strong reporting culture, we ensure our teams are equipped, empowered, and supported to work safely and confidently. By placing wellbeing at the centre of our operations, we create environments where people thrive, both on and off the job.

COMMUNITY

We believe in empowering the communities where we live and work. Beltech Group is committed to supporting local economies, investing in regional development, and creating opportunities through employment, procurement, and training. Whether it's partnering with local suppliers, or contributing to local and First Nation initiatives, we take pride in making a meaningful difference at the grassroots level.

DIVERSITY & INCLUSION

Our differences make us stronger. At Beltech, we actively cultivate an inclusive workplace where individuals from all walks of life feel valued, respected, and empowered to contribute. Our commitment to diversity is reflected in our hiring practices, leadership development, and team culture. It is our belief that innovation thrives in diverse teams so we're building a business where everyone has a seat at the table and a voice that's heard.

GOVERNANCE & INTEGRITY

We hold ourselves to the highest standards of governance, transparency, and ethical conduct. Our decisions are driven by accountability; to our clients, our people, and the communities we impact. Clear policies, robust compliance systems, and strong leadership ensure we act with integrity in every aspect of our work. By doing what's right, not just what's easy, we earn the trust that builds and sustains lasting partnerships.

SUSTAINING SUCCESS

We believe true sustainability means building with purpose, creating solutions that stand the test of time. At Beltech Group, sustainability is about smart, efficient practices that extend asset life, and support our clients' long-term resilience. From material selection and structural integrity to minimal disruption to the surrounding environment, we engineer for durability, responsibility, and value that lasts.

What we do

With deep technical expertise and a hands-on, problem-solving culture, Beltech Group supports complex projects across multiple sectors. From mining, defence and agribusiness to energy and infrastructure, we deliver tailored solutions that meet the demands of high-stakes, high-performance environments.

We deliver trusted maintenance, labour, and end-to-end project support across critical industries, with precision, flexibility, and a people-first approach.

Mining

We deliver turnkey engineering, fixed-plant maintenance, shutdown support, equipment rebuilds, fabrication, and consulting services that keep mining operations running safely and efficiently. Our rapid-response crews and tailored solutions minimise downtime and maximise productivity across the full mining value chain, from processing and material handling to smelting and refining.

Defence

We support Australia's defence capability with advanced engineering, heavy fabrication, precision machining, and compliance-driven project delivery. From vehicle upgrades to critical infrastructure, we deliver mission-ready solutions that meet Defence standards, ensuring durability and performance in demanding environments.

Civil Infrastructure

We deliver tailored civil infrastructure solutions, from structural fabrication and mechanical systems to welding, engineering support, and full project delivery. Partnering on public and industrial projects nationwide, we ensure safe, compliant, highquality construction, practical design, and coordinated execution across transport, utilities, and industrial facilities.

Agribusiness

We support sugar milling and agricultural operations with robust engineering, maintenance, fabrication, and consulting services. From crushing-season shutdowns to boiler repairs and process equipment installs, we deliver tailored solutions that keep your operations safe, efficient, and ready for peak production demands.

Energy

We deliver end-to-end support for Australia's energy sector, from power systems and gas compression to installation, maintenance, and field execution. With expert crews and custom fabrication, we ensure uptime, safety, and compliance, while supporting emerging solar, battery, and hydrogen projects with reliable shutdown support and project delivery.

With precision, innovation, and reliability, we master complex builds and specialist maintenance while providing the responsive, personal service of a true partner.

Precision support for complex Energy projects

Built for performance, from generation and compression to maintenance, installations, and beyond.

Beltech Group supports the energy sector with expertise in fabrication, maintenance, mobile field support, and operational solutions, minimising downtime and maximising asset performance. Our teams deliver across critical scopes including power generation, gas compression, and equipment servicing, from routine checks to major overhauls. We also support emerging infrastructure such as battery storage systems, solar farms, and hydrogen facilities. Whether in remote or high-demand locations, Beltech provides safe, efficient, and reliable services that ensure compliance, uptime, and long-term value across Australia's evolving energy landscape.

POWER GENERATION EQUIPMENT

Beltech Group maintains and services power generation equipment to ensure consistent performance across remote, industrial, and backup power applications.

Services include:

- Generator servicing and overhauls
- Repairs and testing of standby and primary systems
- On-site power station support
- Preventative maintenance plans to reduce downtime

Our expert team keeps your power systems running safely, efficiently, and with maximum uptime, no matter the location.

GAS COMPRESSION & ENGINE SERVICES

Beltech Group specialises in the maintenance of gas compression systems and engine-driven packages, supporting critical energy infrastructure across the supply chain.

Services include:

- Compression unit inspections and overhauls
- Engine diagnostics and servicing
- Repairs to CAT, Detroit, Cummins, and similar brands
- Support for upstream, midstream, and downstream assets

We ensure performance, reliability, and extended asset life in demanding operating environments.

INSTALLATIONS & COMMISSIONING

Beltech Group provides complete installation and commissioning services for energy equipment, ensuring safe, accurate, and high-performance outcomes across all site conditions.

Services include:

- Installation of engines, pumps, and compressors
- Skid-mounted equipment set-up
- Mechanical and structural connections
- Testing and run-time verification

We deliver reliable installations that meet operational demands and support the long-term performance of critical energy assets.

MAJOR MAINTENANCE & REPAIRS

Beltech Group delivers major maintenance and repair services to restore critical energy equipment to peak performance, minimising downtime and extending asset life.

Services include:

- Heavy mechanical repairs and replacements
- Component rebuilds and performance upgrades
- Condition assessments and detailed reporting
- Failure analysis and root-cause repairs

Our team manages complex maintenance scopes with precision, whether during planned shutdowns or emergency response scenarios.

MOBILE FIELD TEAMS

Beltech Group deploys mobile field teams to support critical energy infrastructure across regional and remote locations. Our crews are experienced, compliant, and ready to mobilise quickly for shutdowns, breakdowns, or scheduled works.

Services include:

- On-site repairs, diagnostics, and inspections
- Short- and long-term labour support
- Fully equipped field vehicles
- Preventative maintenance and compliance checks
- Rapid response for operational continuity

We bring the capability, where and when it's needed.

CUSTOM FABRICATION & EQUIPMENT MODIFICATIONS

Beltech Group provides high-quality, custom fabrication services to support energy operations across power, gas, and industrial sites. Our in-house capabilities ensure fit-for-purpose builds, fast turnaround, and full compliance.

Services include:

- Pipe and pressure system fabrication
- Custom skid frames and structural steel
- Equipment rebuilds and modifications
- Coded welding to specification
- Workshop-to-site transport and install

We deliver durable, engineered solutions built to perform in the field.

RENEWABLE & CLEAN ENERGY INFRASTRUCTURE

Beltech supports the construction and maintenance of emerging energy assets – including battery storage systems, solar farms, and hydrogen facilities. We partner with EPC contractors and asset owners to deliver compliant, high-quality work across clean-tech infrastructure.

Services include:

- Shutdowns and maintenance for battery storage and solar farms
- Structural and piping fabrication for hydrogen and renewable assets
- Labour hire and install teams for clean-tech project delivery
- Support for grid-connected infrastructure and regional energy sites

We evolve with energy – delivering what the future demands.

Major Maintenance Restoring Performance and Reliability for Critical Energy Infrastructure

LOCATION: **Australia**

Beltech delivers performance restoration, fault rectification, and full component rebuilds across critical infrastructure to support safe, efficient, and continuous operation of high-value assets. End-to-end service reduced downtime, strengthened reliability, and extended operational lifespan across turbines, compressors, and engine-driven equipment in a demanding energy environment.

SERVICE AREAS

- Major Maintenance & Repairs
- Gas Compression & Engine Services
- Power Generation Equipment
- On-Site Support

I have had the pleasure of working closely with Beltech over the last several years. This company delivers exceptional expertise in steel fabrication, structural recovery in aging plants, and large machinery overhaul and repairs. Their unwavering commitment to safety, reliability, and quality sets them apart, backed by a highly skilled and versatile workforce. A trusted partner for complex projects and critical maintenance.

— Paul Van Wageningen, Projects Construction Coordinator at Nyrstar

Trusted services, tailored to every industry

At Beltech Group, we understand that every industry, and every site, comes with its own set of challenges. That's why we take a tailored approach, combining technical expertise with deep sector insight to deliver reliable, fit-for-purpose solutions.

From our head office in Brisbane, Queensland, we support clients across mining, defence, civil infrastructure, agribusiness, and energy, with a focus on strong partnerships, operational excellence, and results that endure.

SPECIALISED MAINTENANCE, WHEREVER IT'S NEEDED, WHENEVER IT'S NEEDED

We deliver high-performance maintenance solutions across mining, defence, civil infrastructure, agribusiness, and energy sectors, adapting our expertise to suit the unique needs of every site.

From shutdowns and breakdowns to full lifecycle support, our experienced team combines strategic planning, rapid deployment, and hands-on execution to keep critical assets operating safely, reliably, and efficiently.

EXPERT CREWS, READY TO MOVE

We provide expert labour hire solutions across mining, defence, civil infrastructure, agribusiness, and energy sectors, supplying qualified, site-ready personnel tailored to each project's scope, environment, and timeline.

From short-term shutdown support to embedded workforce solutions, we mobilise the right people quickly, backed by strong systems, experienced supervisors, and a safety-first culture.

SUPPORTING EVERY STAGE OF THE PROJECT

Beyond maintenance and labour, we deliver full-spectrum support to keep infrastructure and industry moving, from early planning to logistics and rebuilds.

Our broader service capability supports project delivery across mining, defence, civil infrastructure, and energy sectors, giving clients a single, reliable partner across every phase.
